

User Instruction Manual

Installation Methods

Desktop Application (Recommended)

NOTE: This method might not work for users on macOS. Unfortunately without access to a macOS device myself, I'm unable to export the game for macOS.

Either clone the Sustainify GitHub repository and run the Sustainify.exe file, OR download the Sustainify.exe file from the Sustainify v1.0 Release

The image consists of two screenshots from the GitHub interface. The top screenshot shows the main repository page for 'Sustainify' by AdamMetz. It displays the repository's structure with files like 'Documentation', 'src', 'README.md', and 'Sustainify.exe'. The 'Releases' section on the right highlights 'Sustainify v1.0' as the latest release. The bottom screenshot shows the 'Sustainify v1.0' release page, which includes the release description 'Official executable file for Sustainify' and a list of assets. The 'Assets' section lists 'Sustainify.exe' (68.1 MB, 4 minutes ago), 'Source code (zip)' (6 minutes ago), and 'Source code (tar.gz)' (6 minutes ago). Red boxes highlight the 'Sustainify v1.0' release in the top screenshot and the 'Sustainify.exe' asset in the bottom screenshot.

Sustainify v1.0 (Latest)

AdamMetz released this 2 minutes ago · Sustainify-v1.0 · 7a3fb11

Official executable file for Sustainify

Assets 3

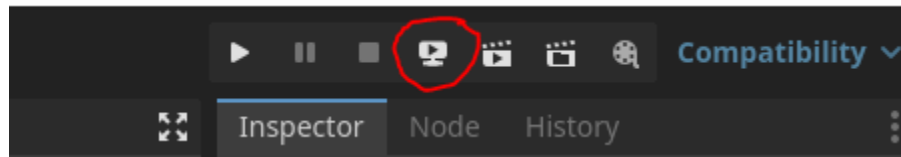

Asset	Size	Time
Sustainify.exe	68.1 MB	4 minutes ago
Source code (zip)		6 minutes ago
Source code (tar.gz)		6 minutes ago

Web Version (Not Recommended)

Running this game on the web locally requires a fair amount of effort.
First, install the latest version of Godot v4 from [Godot](https://godotengine.org/)

Clone the Sustainify GitHub repository, and open the project.godot file within Godot

Click the following button in the Godot editor to host the game locally, and play it within a web browser:

Gameplay

Sustainify is a cookie-clicker game, and has a few basic components:

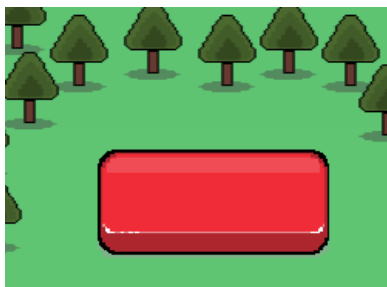

Points Display

The points display shows how many points you currently have, and how many points you are generating every second.

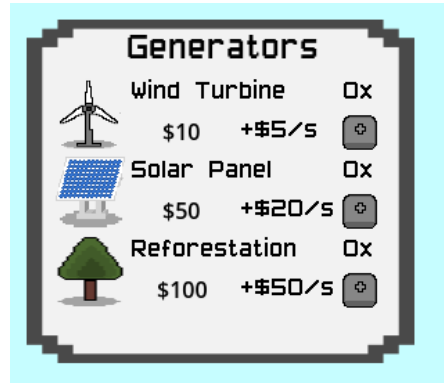

Clicker Button

Everytime you click the big red button, you will earn 1 point.

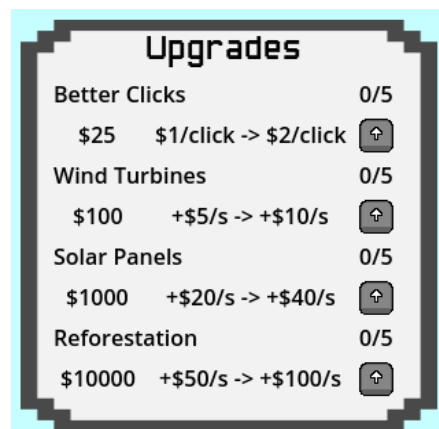

Generators

Generators will generate points for you every second. Generators can be purchased from the generator panel if you have enough points to afford the generator you would like to purchase.

Upgrades

Upgrades can be purchased from the upgrades panel, and will improve your current methods of earning points. For example, the better clicks upgrade can be purchased to double the amount of points you gain from each click. Various generator upgrades can also be purchased that double the amount of points generated by the generator. Each upgrade can be purchased up to five times.

Info Alerts

The first time you purchase a generator, an info alert will appear. Clicking on this info alert will display a popup that provides you with some educational information about the generator. Occasionally new info alerts will also show up for each generator that provides a new piece of information.

Educational Popups

Once an education popup is shown from clicking an info alert, you can click anywhere in the games screen to close the popup. There is also a source link for each popup, that allows you to see the source of information.
